

Introduction to R

Outline

Software installation

- R
- R studio: an integrated development environment (IDE) for R

R tutorial 1

- Common data types and basic operations
- Data import and export

R tutorial 1 & 2

- Data cleaning

Exercises for practicing

- Question list: “exercises.txt”

Remarks

- It is always GOOD to copy the original data for any modifications
- To avoid mistakenly loss of data, always create a new variable instead of replacing the original variable
